

# TYCO Model RFII 5.6K Concealed Sidewall Sprinkler For Commercial Applications

## Features and benefits

- Fits in a typical 2x4-inch stud frame wall configuration
- 250 psi (17,2 bar) maximum pressure rating
- Flat-plate design conceals the sprinkler
- UL and C-UL Listed

## At-a-glance

The TYCO® Model RFII, 5.6 K-factor, Horizontal Sidewall (HSW), standard coverage, quick response sprinkler is a decorative sprinkler featuring a unique flat cover designed to conceal the sprinkler within a wall. The RFII HSW fits seamlessly into traditional 2x4-inch framing to offer more flexibility.

The flat-plate concealed design houses the sprinkler within the wall and the cover plate is available in a variety of colors and finishes, including custom, factory-painted colors. This sprinkler is part of the Tyco family of flat-plate concealed models designed for the commercial space.

Now available in ordinary and intermediate temperature ratings.
